The following is an examiner's statement of reasons for allowance:

Claim 28 and claims dependent thereon are allowed because, as correctly argued by applicant, the reference does not disclose a method wherein an amount of methylene blue and an amount of blood or blood components are stored in separate sterile containers, each container having an inner surface made of a non-polyvinyl chloride plastic material. In Debrauwere methylene blue is initially stored in a separate container that has an inner layer constructed of non-PVC material (22). However, the container (10) can be made of a polyvinyl chloride material that is plasticized and includes stabilizers. There is no teaching of using a container having an inner surface made of a non-polyvinyl chloride plastic material to store the blood or blood component.

With respect to claim 40 and claims dependent thereon, the reference fails to disclose a method wherein the pH of the methylene blue is less than 7. The as-filed specification discloses the advantages of using a pH lower than 7 at page 11, lines 6-20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irene Marx whose telephone number is (571) 272-0919. The examiner can normally be reached on M-F (6:30-3:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Wityshyn can be reached on (571) 272-0926. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
